

Eco Easy Fill System

Dustbane's new Eco Easy Fill System is a great solution for portable dilution of chemicals. It turns any bottle into a portable dispenser with a closed loop, making it very safe and easy to use.

Easy as:

- 1 Insert straw into container
- 2 Put on Easy Fill Dispenser
- 3 Connect to water source

You are ready to go!

DUSTBANE S.A.F.E.

- **Safety** through the integrity of the system in preventing leakage or exposure
- **Accuracy** in precise and foolproof dilution of chemical concentrates
- **Financial** protection by preventing waste or injury
- **Environmental** stewardship in preventing accidental discharge of concentrates

How does it work?

The Eco Easy Fill System is lightweight for easy cleaning anywhere water is available. The unit is connected to a concentrated chemical container, creating a closed loop, and a standard hose is used as the water source.

The water flows through the unit and venturi pressure pulls the correct amount of concentrates as determined by a built-in metering device and mixes it with the water for easy dispensing. The 4 GPM dispensing is ideal for auto scrubbers and buckets.

4 GPM Yellow Code: 51091
Dilution 1:40
Ex: Oxy D.S.T. Bio Bac,
Emerald. Etc.

4 GPM Blue Code: 51092
Dilution 1:80
Ex: Quat Plus, Disappear,
Vanguard, Etc.

4 GPM Green Code: 51093
Dilution 1:120
Ex: Excelsior, Challenger.
Emerald, Etc.
